

Fish *fact sheet*

There are lots of different types of fish in all shapes and sizes!

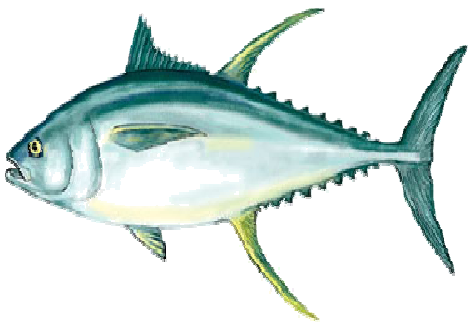

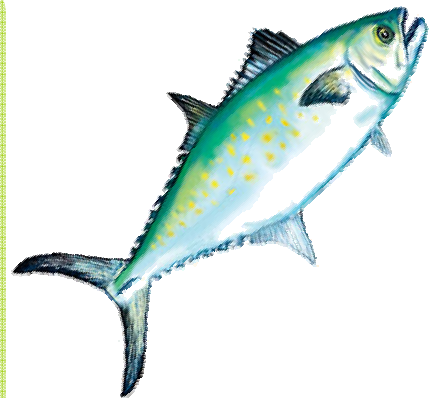

Where do fish live?

Fish lives in rivers, ponds, streams and the sea. Some fish can swim for hundreds of miles. Other fish spend their lives in one place. Some fish live in *rock pools* clinging onto rocks so that they don't get washed away by the sea.

Food

Some fish are big and have big appetites. Some, such as sharks might eat other fish or even people! Other fish are *vegetarians* and only eat seaweed. Some fish are very fast swimmers, so they can catch up with their prey. Other fish lay hidden and jump out on

What do fish look like?

Fish come in all shapes and sizes. Some fish are smaller than a 5p coin, but other fish can be bigger than a boat! Fish have *fins* to help them swim. Some fish have very special fins which are like big suckers which they use to cling on to rocks.

Next time you're at the beach, carefully look in a rock pool and keep very still. You never know - you might see a fish!
